Central Bank Digital Currencies (CBDC)

- CBDC is a programmable form of money as part of a move to a cashless economy. CBDC works like a coupon/voucher to limit your ability to purchase only approved items. It's not your money.
- Cashless digital transactions currently occur using credit cards and ATM cards. These transactions cannot be externally controlled, like a CBDC.
- CBDC allows politicians and bankers to digitally track, control, and data mine all of your spending. Every transaction is recorded forever, and there is no anonymity.
- CBDC can be assigned a carbon score to limit your ability to purchase items like gas and meat. CBDC can be assigned a location in which you may spend, thus limiting your ability to travel.
- CBDC is a precursor to a move to a cashless economy. CBDC can be frozen or confiscated without due process of law. CBDC value can be diminished, via negative interest rates on savings accounts. It's not your money.
- CBDC can limit your ability to store cash for emergencies or to escape domestic violence. It's not your money.
- CBDC may be implemented via Universal Basic Income (UBI)

Digital ID:

- Digital ID is a unique digital identification for all persons such as a QR code on your phone, fingerprint, retinal scan, or facial scan - works like a globally coordinated Social Security Number.
- G20 members (Western nations), the United Nations (UN), and the World Economic Forum (WEF) continue to push for digital passports to travel.
- Vaccine mandates have been employed by the European Union (EU) and the Global Alliance for Vaccines and Immunizations (GAVI) to create Digital IDs. This was expanded during the response to COVID.
- The proposed pandemic treaty promoted by the World Health Organization (WHO) employs global digital surveillance. Which is under the guise of stopping future pandemics, assuming such pandemics will become routine. This program has been promoted well before COVID.

CBDC and Digital ID are the foundation of a Chinese-style social credit system and are being implemented concurrently across the West.

The movement is called The Great Reset a.k.a. Build Back Better. The plan is to implement this system via manufactured energy and fertilizer shortages → leading to rationing for "equity" → managed via Digital ID and CBDC/UBI. Social control via a cashless economy.

What you can do:

- Become informed. Read more at the website.
- Speak up to family, friends, and neighbors. Be authentic and humble.
- Spend cash while handing out small fliers (download at the website)
- Write letters to politicians and community leaders (sample letter on the website)
- Write letters to local newspapers (sample letter on the website)
