

**1** **I am paying in cash to support local businesses and resist a move to a cashless economy.**  
In a cashless economy, all transactions are performed with Central Banking Digital Currencies (CBDC).

**Central Bank Digital Currencies:**

- Allow politicians and bankers digital tracking and control of all of your spending.  
Works like a coupon/voucher. It's not your money, it can only be spent on approved items.
- Can be assigned a location in which you may spend, thus limiting your ability to travel.
- Can be assigned a carbon score to limit your ability to purchase items like gas and meat.
- Limits your ability to save cash for emergencies or to escape domestic violence.
- May be confiscated or frozen without due process of law.
- Every transaction is recorded forever. There is no anonymity. No garage sales and no swap meets.

- Concurrent with CBDC, establish a globally coordinated unique identification for all people such as a QR code on your phone, fingerprint, retinal scan, or facial scan.
- G20 members (Western nations) and the United Nations (UN) continue to push for digital passports to travel.
- Vaccine mandates were used to introduce digital passports. European Union (UN) and the Global Alliance for Vaccines and Immunizations (GAVI) promoted this before COVID.
- World Health Organization (WHO) pandemic treaty proposed global digital surveillance under the guise of stopping future pandemics. This too was promoted before COVID.
- Facial recognition cameras are being installed throughout the West.
